

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

1-20. (Canceled)

21. (Currently amended) A method of lowering plasma concentration of a lipoprotein Lp(a) in a mammal, comprising administering to the mammal a composition of biochemical substances comprising ascorbic acid, ascorbyl palmitate, beta-, gamma-, delta-tocopherol-mix, beta-carotene, biotin, calcium ascorbate, calcium glycinate, ~~carotenoid mix: (2-Lasotene, Lutein, Zea-Cryptoxanthin)~~, carotenoid mix, cholecalciferol, chromium glycinate, citrus bioflavonoids, coenzyme Q10, copper glycinate, cyanocobalamin, d-alpha-tocopherol, d-calcium pantothenate, dicalcium phosphate, folic acid, inositol, L-arginine, L-carnitine, L-cysteine, L-lysine, L-proline, L-seleomethionine, magnesium ascorbate, magnesium glycinate, manganese chelate, molybdenum glycinate, niacin, niacinamide, potassium chelate, pycnogenol, pyridoxine, riboflavin, thiamine, and zinc glycinate, wherein the composition is in therapeutically effective amounts to lower the plasma concentration of the lipoprotein Lp(a) in a mammal.

22. (Canceled)

23. (Canceled)

24. (Original) The method according to claim 21, wherein the mammal is a human.

25. (Currently amended)The method according to ~~any one of claims 21-24~~ claims 21 or 24, wherein the plasma concentration of the lipoprotein is lowered by at least 4%.

26. (Currently amended) The method according to ~~any one of claims 21-24~~ claims 21 or 24, wherein the plasma concentration of the lipoprotein is lowered by at least 8%.

27. (Currently amended) The method according to ~~any one of claims 21-24~~ claims 21 or 24, wherein the plasma concentration of the lipoprotein is lowered by at least 12%.

28-31. (Canceled)

32. (Previously presented) The method according to claim 21, wherein ascorbic acid is 1,580 mg, niacin is 60 mg, lysine is 110 mg, and proline is 110 mg.
